Company: *WorkSmart Pvt Ltd*

The HR department of **WorkSmart Pvt Ltd** wants to analyze employee productivity and identify patterns of workplace laziness.

They collected **200 employee activity records** over one month.

Your task as a **Data Analyst** is to build a Power BI dashboard to analyze "Laziness Index" and provide insights.

Dataset Structure (200 Records)

Each row represents one employee's weekly activity summary.

Column Name	Description
Employee_ID	Unique ID (EMP001 – EMP200)
Department	HR, Sales, IT, Finance, Marketing
Work_Mode	WFH / Office
Login_Hours	Total login hours per week
Active_Work_Hours	Actual productive hours
Idle_Time_Hours	System idle hours
Break_Time_Hours	Break duration
Tasks_Assigned	Number of tasks assigned
Tasks_Completed	Number of tasks completed
Deadline_Missed	Yes / No
Meetings_Attended	Count of meetings
Social_Media_Usage_Hours	Hours spent on non-work browsing
Performance_Rating	1 to 5
Salary_Level	Low / Medium / High

Business Definition

$$Laziness\ Index = \frac{Idle\ Time + Break\ Time + Social\ Media\ Usage}{Login\ Hours}$$

If:

- Index < 0.25 → Productive
- 0.25 – 0.40 → Moderate
- 0.40 → High Laziness

Tasks

Part 1: Data Modeling

1. Import the dataset (200 records).
2. Clean column names.
3. Create calculated columns:
   - Task Completion %
   - Laziness Index
   - Productivity Category

Part 2: Create DAX Measures

Total Employees
Average Laziness
Average Completion %
High Laziness

Part 3: Dashboard Requirements

Must build:

1. KPI Cards:
   - Total Employees

- Avg Laziness Index
- Avg Completion %
- High Laziness Employees

2. Bar Chart:
    - Laziness Index by Department
3. Stacked Column:
    - Work Mode vs Productivity Category
4. Pie Chart:
    - Productivity Category Distribution
5. Scatter Plot:
    - Login Hours vs Tasks Completed
    - Size = Social Media Usage
6. Table:
    - Top 10 most lazy employees
7. Slicers:
    - Department
    - Work Mode
    - Salary Level

Analytical Questions

1. Which department has the highest average laziness?
2. Is WFH more associated with laziness?
3. Does salary level impact productivity?
4. What is the relationship between social media usage and missed deadlines?
5. Who are the top 5 most productive employees?
6. Is meeting attendance affecting task completion?

7. Which department needs HR intervention?

Advanced Tasks

- Create a Dynamic Title using DAX
- Add Conditional Formatting (Red for High Laziness)
- Create a Drillthrough Page for Employee Details
- Add a Decomposition Tree to analyze laziness drivers
- Use What-If Parameter to simulate reduced break time

Realistic Twist

Add:

- 10 employees with extremely high social media usage
- 15 employees with perfect completion rate
- 5 employees with zero missed deadlines
